a synergistic journal

MAN-ENVIRONMENT SYSTEMS - M-ES - is a forum for communications bearing on the interface between research in the behavioral and social sciences and the design and management of the socio-physical environment.

The award-winning design of M-ES allows the reader maximum flexibility in using the loose-leaf and separately bound contributions. The total can be easily scanned yet the parts can be integrated into topic files or circulated as reprints.

M-ES is published bimonthly, each volume of six issues contains a minimum of 384 pages. Contributions appear under several categories; the E, P and R series are submitted on invitation by the Editors.

B - Bibliography	N - News or Notice
C - Commentary	P - Invited Paper
E - Editorial	R - Book Review
L - Letter to the Editor	S - Summary
M - Upcoming Meeting	

M-ES is published by the Association for the Study of Man-Environment Relations, Inc. - ASMER - a non-profit membership organization. The aim of ASMER is to contribute to the advancement, dissemination and application of knowledge concerning the mental interrelationships between the environment and human behavior.

Membership in ASMER is open to:

1. Members of academic disciplines working on environmental problems in such social-science fields as anthropology, economics,

geography, political science, psychology, psychiatry, and sociology.

2. Persons affiliated with institutions with interdisciplinary staff focusing on environmental problems in such areas as population policy, design and behavior research, and ecological research.

3. Persons from disciplines such as physics and biology, who have a specific interest in social-science aspects of environmental problems.

4. Persons in cognate applied fields with a commitment to the improvement of socio-environmental aspects of their fields, e.g., architects and planners, persons in the fields of transportation and civil engineering, wildlife management, conservation, law, etc.

Those enrolled in a degree program (above the Bachelor's level) in a field falling within the purview of the Association will be admitted as Student Members.

Members have a role in the affairs of the organization, will have priority in being invited to Workshops, special meetings, etc., and will obtain our publications at a discount.

Application blank on request.

Membership in ASMER (annual rate starts 1974)
\$20.00 per year (\$12.00 for students)
Membership includes subscription to M-ES

subscriptions to mes and applications for asmer membership may be obtained through:

the association for the study of man-environment relations, inc.
pa box 57 orangeburg new york 10962

Postpaid subscriptions to M-ES per 6 issues

The first part of the paper discusses the importance of the study of the history of the United States. It is argued that a knowledge of the past is essential for a full understanding of the present. The author then goes on to discuss the various factors that have shaped the development of the United States, including the role of the government, the influence of the economy, and the impact of the culture. The author concludes by stating that the study of the history of the United States is a vital part of the education of every citizen.
